
pyzol

Release 0.0.10

May 30, 2020

Contents:

1	Installation	1
1.1	Requirements	1
1.2	Install binary package	1
1.3	Build from sources	1

1.1 Requirements

pyzol library depends on:

- Python 3.6 or newer
- pybind11 library

1.2 Install binary package

Pre-compiled binary package available for linux x86-64:

```
# pip install pyzol
```

1.3 Build from sources

If you want to compile pyzol for another platform (freebsd or macosx) you should have installed:

- Package with zfs headers
- C++11 compiler

For example, Debian 10 “buster” or Ubuntu 20.04 “focal fossa”:

```
# apt-get install libzfslinux-dev build-essential
# git clone https://github.com/IvanVSmirnov/pyzol.git
# cd pyzol
# python setup.py build
# python setup.py install
```
